

# Measure (°C) safely and accurately and monitor food with the Sitex Foodsafe App

**NO MORE PAPER WORK  
OR WASTE OF TIME!!**

*“An indispensable app for anyone preserving, preparing, processing or selling food.”*

## Have you experienced these problems before?

Then the **Sitex Foodsafe App** is exactly what you're looking for!

- Too much paper work when measuring temperatures while preparing food and meals.
- Keeping a record of all the relevant details is time-consuming.
- Employees who measure food temperature incorrectly, inaccurately or not at all.
- You don't know whether the temperatures measured meet the HACCP standards.
- Measurements aren't registered properly.
- Monitoring product shelf life is tedious, especially in a restaurant or home shop.
- No real idea as to whether the food is served within the time set.
- The Food and Consumer Product Safety Authority criticises your measuring method for food safety purposes.

## WHAT DOES THE **FOODSAFE** PACKAGE INCLUDE?

Apple iPod  
Touch 16gb

Hygienic stainless steel  
penetration probe

Sitex Foodsafe  
App

# How will you benefit from the **Sitex Foodsafe App**?

- ✓ You'll save time because all you need to do is measure. The **Sitex Foodsafe App** automatically registers and monitors everything for you!
- ✓ The user personally sets up the App, decides what products are to be measured and how this is to be done.
- ✓ Facility to set an alarm containing the top and bottom limits per product. Measurements are taken according to HACCP standards.
- ✓ Facility to add images to products.
- ✓ You receive an alert if food is not served within the time set.
- ✓ Monitoring and alerts for products with specific reference to shelf life according to the Best Before Date entered.
- ✓ Employees are responsible for tasks performed. Employees can be identified by their personal login codes.
- ✓ No need to rummage through confusing paper work. Your data are automatically saved in an online database.
- ✓ Filing problems are a thing of the past. You can retrieve any data in the database at any point in time - detailed or summarised. Daily reports on all measurements and alerts for any scheduled actions.
- ✓ User-friendly interface without needing to waste the user's time to process and analyse data. This saves you time and money.
